

Dragonfly Insects

Dragonfly Insects - Dragonfly. A dragonfly is an insect belonging to the order Odonata, infraorder Anisoptera (from Greek ?????? anisos, "unequal" and ?????? pteron, "wing", because the hindwing is broader than the forewing). Adult dragonflies are characterized by large, multifaceted eyes, two pairs of strong, transparent wings,...Dragonfly. Dragonfly, (suborder Anisoptera), also called darner, devil's arrow, or devil's darning needle, any of a group of roughly 3,000 species of aerial predatory insects most commonly found near freshwater habitats throughout most of the world. Damselflies (suborder Zygoptera) are sometimes also called dragonflies in...Dragonfly. As an adult I will eat other small insects, primarily mosquitoes, and I am considered useful for controlling the mosquito population. Dragonflies are carnivorous in both larval and adult stages. What I look like: I can be any color and range in size by species from one to five inches. My antennae are very short.Giant Dragonfly Recycled Art Wings Framed Art Blue Dragonfly Insect Art Steampunk Dragonfly Mother's Day Gift For Her Wall Art Home Decor ElecTrickeryShop 5 out of 5 stars (122) \$ 602.43 \$ 669.37 \$ 669.37 (10% off)
